

Saqiit is an all-in-one society management platform built for residents, committee members, and security staff. Below is a complete overview of every feature — what's live today, and what's coming next.

Core Modules

Resident & Flat Management

Maintain a complete digital record of residents, owners, tenants, and flat/unit details in one organized, searchable directory.

LIVE

Maintenance Billing & Payments

Generate maintenance invoices automatically, collect payments online, and track dues, receipts, and payment history transparently.

LIVE

Recharge Generator

Prepaid backup power for outages — residents recharge generator credit for their flat, and power supply is switched on automatically based on their available balance.

LIVE

Visitor Management

Log visitor entries and exits digitally, notify residents in real time, and maintain a searchable visitor history for security audits.

LIVE

Complaints / Helpdesk

Let residents raise complaints or service requests, track status in real time, and give committees a clear resolution workflow.

LIVE

Announcements

Broadcast notices, circulars, and updates instantly to all residents through in-app notifications, keeping the entire society informed.

LIVE

Security / Guard App

A dedicated app for gate security staff to manage visitor approvals, entry/exit logs, and emergency alerts from the gate itself.

LIVE

Coming Soon

Staff Management

Manage domestic help and society staff records, attendance, and identity verification in one place.

COMING SOON

Parking

Allocate, track, and manage parking slots for residents and visitors with clear ownership records.

COMING SOON

Facility Booking

Enable residents to book shared amenities like the clubhouse, gym, or party hall online, with availability calendars.

COMING SOON

Delivery Management

Track and verify courier and delivery entries at the gate, with resident notifications for pickups.
